## EXECUTIVE SUMMARY

D3.2 – Co-creation ecosystem programme is a ‘living’ document. Periodically, it will be updated, formally at months 15 and 30.

It describes the PEERS Co-creation Group and includes details on its aims, applied approach for implementation, evolution stages and planned restructuring details along the course of the project.

Sustainability and maintainability are to the foreground of the undertaking. These project characteristics are an integral part of the highly intensive foresight co-creation approach. Both quantitative and qualitative feedback is captured and will continue through the course of the project.

Details of the undertaken are held in the project private repository (i.e., Microsoft Teams) and regularly updated as a means to keep all members of the consortium updated on an on-going basis.

Section 1 introduces the PEERS project.

Section 2 presents an overview of the world we are moving to.

Section 3 describes the RoadMap Programme Methodology.

Section 4 presents the PEERS Co-creation Group Aims and Structure.

Section 5 provides general conclusions.

The PEERS Co-creation Group initiative is led by TFC Research and Innovation Limited in close collaboration with University of Galway, in particular.
