Version 2.0

This version of the document provided an update on the Co-Creation engagement approach in particular to the alpha stage and beta. Lessons learnt were brought forward to strengthen the next stage of the Co-creation engagement process and this has been presented within the context of version 2.0. This undertaken will also continue into the Gamma stage.

EXECUTIVE SUMMARY

Deliverable D3.2 is a 'living' document. Periodically, it will be updated, formally at month 15 (i.e., this document v2.0) and at month 30. It describes the PEERS Co-creation Group including details on its' aims, applied approach for implementation, evolution stages and planned restructuring details along the course of the project. Sustainability and maintainability are to the foreground of the undertaking. These project characteristics are an integral part of the adopted and highly intensive foresight co-creation approach. Both quantitative and qualitative feedback are captured and will continue through the course of the project. Details of the undertaken are held in Teams and regularly updated as a means to keep all members of the consortium updated on an on-going basis.

The PEERS Co-creation Group initiative is led by TFC Research and Innovation Limited in close collaboration with University of Galway, in particular.
