## EXECUTIVE SUMMARY

This Deliverable, D4.1, Ecosystem Design report, presents the ongoing development of the PEERS ecosystem to date as well as the technical support that is applicable for the adaptation of the PEERS platform. The advancement of the PEERS platform is directly aligned with the undertaking of Task 3.1 – Co-creation ecosystem vision stakeholder validation. The deliverable maps the ecosystem at policy level as well as from a technical input perspective which is in line with the foresight engagement process applied in WP3 - PEERS Co-creation. The importance of interoperability connectivity for the PEERS platform, referring to the software environment within which users interact with PEERS and the ecosystem, referring to the environment within which the platform operates” is also well explained.
