Executive Summary

The PEERS (PracticE Ecosystem for standaRdS) project aims to create a practitioner-driven ecosystem that supports pre-normative and standardisation processes, particularly focusing on disaster risk resilience and CBRN-E (Chemical, Biological, Radiological, Nuclear, and Explosive) sectors. The Beta release represents a critical milestone in the project, building upon the foundational work established in the Alpha release. This report outlines the technical enhancements, migration to a cloud-based infrastructure, integrating of social features and improved

data management capabilities in the PEERS platform.
