Version 2.0

This version of the document provided an update on the Co-Creation engagement approach in particular to the alpha stage and beta. Lessons learnt were brought forward to strengthen the next stage of the Co-creation engagement process and this has been presented within the context of version 2.0.

Version 3.0

This version of the document provided an update on the Co-creation engagement since the previous issue (v2.0 / January 2024). A further comprehensive WP3 engagement programme was developed, which was activated in February 2024 through to January 2025, leaving a strong legacy behind for the next stage of the project. The webinars are based on the designed and developed beta platform/ecosystem (branded as the CBRNe Knowledge Hub) was well received through WP5 demonstrations with WP6 in support throughout.

EXECUTIVE SUMMARY

This deliverable is the final iterative version of the document “PEERS Co-Creation ecosystem programme”. Previous issues were delivered in June 2023 (i.e., D3.2 – version 1.0) and January 2024 (i.e., D3.5 - version 2.0). The deliverable describes the undertaking of PEERS Co-creation engagement implemented through WP3 (PEERS Co-Creation) over the course of the project. It addresses the aims, applied implementation approach evolution stages over the course of the project. The deliverable contains the following sections:

Section 1 Introduction

Section 2 The Changing World –

Section 3. RoadMap Programme Methodology

Section 4. PEERS Co-creation Group Aims and Structure

Section 5 Conclusion

Co-Creation engagement provided valuable feedback on the pre-alpha, alpha versions for the development and later beta version of the PEERS ecosystem, branded as the “CBRNe Knowledge Hub”. Sustainability and maintainability are and have been central to the projects’ efforts and in this vein, in November 2024, following internal consortium discussions, a decision was taken for the use of the Standardisation Cluster of Projects (CSTAC) to be the prime source for engagement beyond the life of the project and in doing so, extend the Hub's reach and to help ensure its widespread uptake and long-term relevance for the target community.
